

New Energy Ideas at **INNOVATION PARK**

Energy start-ups located at Innovation Park will discuss their companies with time afterwards for networking!

Thursday, October 3

Greenhouse, Innovation Park

1400 Angela Boulevard

3:00—4:30 PM

Welcome

Dave Brenner, Executive Director

Company Highlights

SlipStream

Working to create an ultra-efficient hybrid vehicle system that utilizes ultra-capacitors as an energy buffer in vehicles, potentially enabling a dramatic reduction in fuel consumption.

Ionic Research Technologies

Focusing on the research and development of ionic liquid technologies for energy related applications, such as carbon capture and refrigerants.

Green Youth Foundation

Providing opportunities for the assembly of solar lamps for students in Kenya to use at night to study.

Let's Share the Sun Foundation

Focusing on bringing solar energy to Haiti schools to reduce costs and improve quality of life.

Networking!

Whether you have an emerging idea or a well-developed business, Innovation Park at Notre Dame provides a dynamic environment for your venture to accelerate. We're here to share our business expertise and vibrant facilities to help entrepreneurs Connect, Collaborate and Commercialize.
