Panel on University and City Partnerships and Research

Smart Cities. Big Ideas.

National Partnerships:

The MetroLab Network at Work in South Bend

September 29, 4:00 – 5:00 p.m.

McKenna Hall Auditorium
Light Refreshments 3:30-4:00 p.m. in McKenna Atrium

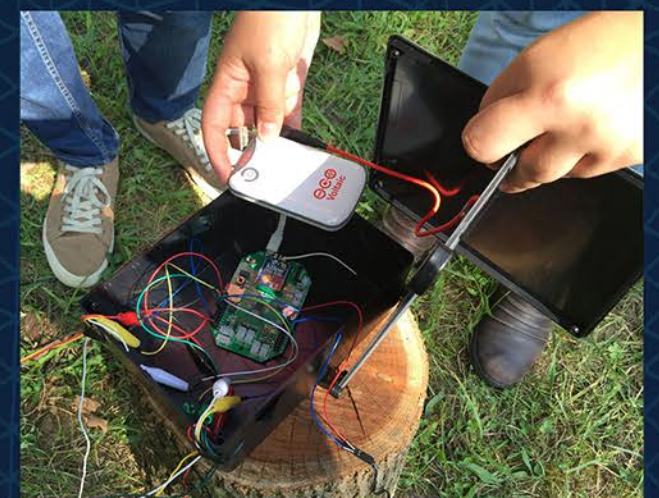

MODERATOR, Becca Blais
Vice President of the Student Body
University of Notre Dame

Addressing the challenges of today's urban environment requires a collaborative effort, one that is multi-disciplinary, multi-agency, multi-university ... sometimes even multi-city. The bottom line is that we're in this together. And, if we want to make a difference in urban areas regarding health, mobility, security and opportunity, aging infrastructure, and environmental sustainability, we need to work together.

This panel discussion brings together members of the MetroLab Network from the national level as well as those working locally to make a difference and develop effective solutions that help cities and their residents benefit from technologies and leverage the resources available to them.

This event is open to the campus and South Bend.

The general public may park in the Compton Family Ice Arena lot and take the shuttle from the shuttle shelter directly to McKenna Hall. The shuttle also picks up from McKenna and drops off at Compton.
