Applications are now being accepted to the **Slatt Fellowship for Undergraduate Research in Energy Systems and Processes** summer research program at the University of Notre Dame. Up to three fellowships of $5,000 each will be awarded to undergraduate students affiliated with the Atlanta University Center Consortium.

Awards are used to support student stipends, transportation, housing, and other living expenses while attending Notre Dame. Students will be matched with faculty who have similar research interests in energy topics, such as energy conversion and efficiency, smart distribution and storage, sustainable bio/fossil fuels, sustainable and secure nuclear, transformative solar, and transformative wind.

**APPLICATIONS ARE NOW BEING ACCEPTED!**

**Current Sophomores and Juniors may apply**

Administered by the Center for Sustainable Energy (ND Energy)
