Overview

The National Nuclear Security Administration (NNSA) Graduate Fellowship Program (NGFP) is transforming the next generation of nuclear security, nonproliferation policy, and technical leaders.

Our one-year, salaried fellowships offer unmatched opportunities across the NNSA enterprise. Fellows learn about nuclear technology applications while shaping nonproliferation policy and decision making.

NGFP fellows are highly sought after by employers, including the NNSA and other leading national security partners in national laboratories, academia, and industry.

About the NNSA

NNSA, as part of the U.S. Department of Energy (DOE), is responsible for stewardship of the nation's nuclear

stockpile, nuclear nonproliferation, and naval reactor programs. The agency responds to nuclear and radiological emergencies in the United States and abroad. NNSA funds research and development in advanced detection and other technologies related to nuclear security and nonproliferation. Pacific Northwest National Laboratory (PNNL), a DOE National Laboratory, administers NGFP for NNSA.

Eligibility

Candidates must meet the following requirements:

- » Currently enrolled and matriculated in a graduate degree program OR
- » Completed a graduate degree program within 18 months prior to the application deadline
- » Final and current cumulative GPA of at least 3.20/4.00 in the graduate degree program
- » U.S. citizen eligible for a security clearance
- » Available to work full time for the duration of the fellowship (June 2019-2020)

Apply Now

Learn more and apply online at: http://ngfp.pnnl.gov.

Qualified applicants must submit the NGFP application followed by an expression of interest letter, a résumé or CV, transcripts, and at least two letters of recommendation.
