

# *“Multi-Peril Catastrophe Models: Uses and Applications for Resiliency”*

- Friday, October 12
- 12:50 pm – 1:40 pm in Geddes Hall B036

**Andrew O'Donnell, B.S., M.S., University of Notre Dame**, is a Senior Engineer II in the Research and Modeling department at AIR Worldwide. He works on the Earthquake Vulnerability team developing damage functions for AIR's global suite of earthquake models. Since joining AIR in 2014 Andrew has worked on the development of AIR's earthquake models for Southeast Asia, Australia, and the United States. Most recently Andrew has been leading the development on AIR's latest seismic risk model for New Zealand.
