A group of 28 engineers and scientists have proposed a bold new plan to create an energy corridor along the US-Mexico border. This park would incorporate natural gas plus wind and solar power, along with desalinated water from both coasts, to create an economic zone of industry, education, and agriculture.

Luciano Castillo  
Kenninger Professor of Renewable Energy and Power Systems, Purdue University

SEPTMBER 9  
7:00 pm  
104 Bond Hall
