

NOTRE DAME MOVES TOWARD DECARBONIZATION

Notre Dame's coal pile will soon be relegated to the bins of history. Work has begun on the new hydroelectric plant on the St. Joseph River, the new East Plant is handling thousands of tons of geothermal capacity, and efficiencies have lowered overall energy usage by nearly six percent.

Paul Kempf

Assistant Vice President for Utilities
and Maintenance,
University of Notre Dame

SEPTEMBER 10

4:00 pm

104 Bond Hall
