

Edison Lecture Series

**WORKING IN
30
COUNTRIES
OVER
40
YEARS...**

**opportunities for engineers
have no bounds**

Joe Adams is recently retired as president of Energy and Industry for MWH (now a part of Stantec) in Broomfield, Colo. In his role,

he oversaw global strategy as well as the day-to-day operations for services to the energy, mining, oil and gas, environmental and manufacturing sectors. He is also past president of Engineers Without Borders USA and has recently completed trips to Guatemala and Nicaragua where 200 projects are under way to bring clean water and sanitation to communities in need.

**Thursday, Oct. 31
3:30 p.m.
DeBartolo, Room 126**

The demand for engineering talent has never been higher and will continue to expand for years. Every segment of the engineering space is evolving with changes in technology, materials, equipment, and global partnerships. The types of employment are also limitless.

This presentation details a career spanning over 30 countries and 40 years to show that your options are only limited by your imagination. It will also highlight Engineers Without Borders and show how that organization is working to build a better world.
