1ST ANNUAL
DOCTORAL STUDENT PARTICIPATORY WORKSHOP ON
CLIMATE & ENERGY DECISION MAKING

Join doctoral students from across North America to share your work on climate and energy decision making!

In the spring of 2022, Carnegie Mellon University will host a two-day workshop for PhD students and post-docs working on the technical and behavioral aspects of climate mitigation, adaption, resilience, and deep decarbonization to present their work, meet other young investigators, and exchange ideas on these complex problems.

Participants will present 15-minute talks and receive feedback from prominent experts from academia, industry, and environmental NGOs. Each day will also feature professional development events on a variety of topics.

To apply, submit a one-page abstract by March 15, 2022 at cedmcenter.org/studentmeeting

Participants who are selected will be notified by April 15, 2022. Some limited travel funds are available for those who can find no other source of support.

All participants will be required to show proof of COVID-19 vaccination and, depending on circumstances, may be required to wear a mask.

May 18-19, 2022
Carnegie Mellon University Campus
Pittsburgh, PA 15213
