

2ND ANNUAL DOCTORAL STUDENT PARTICIPATORY WORKSHOP ON **CLIMATE & ENERGY DECISION MAKING**

Join doctoral students from across North America to share your work on climate and energy decision making!

In the spring of 2023, Carnegie Mellon University will host a two-day workshop for PhD students and Postdoctoral fellows working on the technical and behavioral aspects of climate mitigation, adaptation, reliance, and deep decarbonization to present their work, meeting other young investigators, and exchange ideas on these complex problems.

Participants will present 20-minute talks, followed by 10 minutes of feedback from prominent experts in academia, industry, and environmental NGOs. Each day will also feature small group workshops on a variety of topics.

To apply, submit a one-page abstract by March 17, 2023 at cedmcenter.org/studentmeeting

Participants who are selected will be notified by April 7, 2023. Some limited travel funds are available for those who can find no other source of support.

All participants will be required to show proof of COVID-19 vaccination, and, depending on circumstances, may be required to wear a mask.

May 17-18, 2023
